

BACKGROUND:

A silencer has been installed on top of the air cleaner housing of the H1B (disc-brake model). The resulting decrease in overall vehicle noise is gained by damping out the "moaning" sound from the engine air intake system. This air horn must be used on all 1972 H1's sold in California to meet the State's lower standards for motorcycle noise levels, which takes effect in January 1972.

PROBLEM:

Because of a production error, some of the initial shipment of H1B's were not equipped with the silencer at the factory. These motorcycles must have the silencer installed before sale in California. To promote better relations with the non-motorcycling public, the silencer should be installed on all H1B's in the field. The required parts are shown below.

	DESCRIPTION	P/N	REMARKS
1	Pan Head Screw	220B0645	6 x 45 (2 ea.)
2	Plain Washer	92022-125	6mm (2 ea.)
3	Damper Rubber	92075-118	(2 ea.)
4	Collar, Silence	92027-149	(2 ea.)
5	Silencer	11016-004	
6	Gasket	11017-008	

CAUTION:

Don't use overlong screws and don't leave out any washers or the screws will protrude from the bottom, damaging the battery.

WARRANTY INFORMATION:

Install the air cleaner silencer on any H1B which was not originally equipped with the silencer using job code X007 (0.1 hr.)

This is a factory directed modification, CLAIM TYPE 3 on the Warranty Request Form.

NOTE: Dealers subscribing to the Small Claims Option Program are required to perform this modification and submit a Warranty Request Form for each unit so modified. The Small Claims Option Program applies to claim types 1 and 2 only. ■
